To be a part of an enthusiastic work environment, where I can enhance my knowledge and apply my technical skills to accomplish organizational goals.

Skills

Programming:	Python, C++, JavaScript, SQL
Generative AI:	LLMs, Prompt Engineering, RAG, AI Agents, Agentic AI, Function/Tool Calling, Embeddings,MCP, LLM Evaluation
AI Frameworks:	LangChain, LangGraph
Backend:	FastAPI,REST APIs,Node.js
Databases:	SQL,FAISS, ChromaDB

Work Experience

Tata Consultancy Services (TCS) *Pune, Maharashtra | Nov 2024 – Present*

- Built a **local RAG-based AI agent** to index and retrieve information from project documentation and Software Requirement Specifications (SRS), cutting engineers' time to locate relevant technical requirements.
- Migrated software modules from **VxWorks to QNX**, resolving platform-specific compatibility issues and validating functional correctness across the transition.
- Designed and implemented **UDP-over-Ethernet** communication between QNX devices and Qt applications for real-time embedded data exchange.
- Debugged and resolved issues across embedded software components through systematic testing, improving system reliability.

Education

Bachelor of Technolgy ,
Shri Guru Gobind Singhji Institute of engineering and technology,Nanded 2021 — 2024
CGPA - 8.30

Higher Secondary Education,
Walchand college of arts and science, Solapur 2019 — 2020
*Percentage - 77 % Cet percentile- **94.5***

Secondary Education,
Suyesh central school, Solapur 2017 — 2018
Percentage - 85 %

Project

Smart Finance Agent **8 2026 — 9 2026**

- built a multi-agent financial assistant using **LangGraph** and **Google Gemini**, with an LLM-based router dynamically dispatching queries across specialized agents
- integrated **Model Context Protocol (MCP)** to connect live Alpaca brokerage tools and built a custom schema sanitizer to fix MCP–Gemini function-calling compatibility
- implemented safety guardrails by excluding order-execution tools from default LLM access, plus a portfolio risk/diversification tool for informed trading decisions
- added persistent multi-turn conversation memory using **SQLite**-backed LangGraph checkpointing and a **Streamlit** UI, along with NL-to-SQL and RAG tools

Online Banking App **07/2023 — 9/2023**

- Build a secure online banking App in which users data is authenicated using passport.js middleware.
- the data of users is stored at a mongoDB local server and passwords are encrypted using **hashing and salting**.
- made different routes using ejs and backed it up with express
- made the website **responsive** using bootstrap framework and custom css
- App is build using **mongodb,ejs,express,html,css,javascript**.
